ERIN WALDRON FROM DATA DOZEN

DATA VISUALIZATION 101

WHAT IT IS, WHAT IT'S NOT, AND WHAT YOU CAN DO WITH DATA VISUALIZATION

HELLO!

I'M ERIN WALDRON, OWNER OF DATA DOZEN

DATA DOZEN
a visual analytics studio

DATA VISUALIZATION 101: WHAT IT IS, WHAT IT'S NOT,
AND WHAT YOU CAN DO WITH DATA VISUALIZATION

ERIN WALDRON
www.datadozen.com

MY CAREER PATH

DATAVIZ 101

what it is, what it's
not, and what you
can do with data
visualization

TIME

Each session runs
approximately 90
minutes.

NOTES

Make sure you have
a way to take notes
about your projects.

EFFECTIVE DATA COMMUNICATION

the 5 most common
mistakes we make
when communicating
with data

HERE'S WHAT WE'LL DO TOGETHER

WHAT IT IS

Data visualization brings data to **life**.

IMAGINE YOU HAVE TO CREATE THIS DATASET

- ▶ Subject Matter

Animals are mobile, look similar, could be extinct or just scarce

- Taxonomy

Which animals to include, how to categorize them, and how granular to be

- Consistency

Different teams across different regions
spanning multiple years

[illegible]

NOW IMAGINE YOU SUCCEED AND PUBLISH THE DATASET

crickets...

THE TRUTH

Most people **don't** read data.

THE POWER OF DATA VISUALIZATION

- ▶ Translates
Incomprehensible rows of data become information we can actually understand.
- ▶ Democratizes
Offers an approachable format regardless of an individual's technical background.
- ▶ Humanizes
At its best, transforms the rigid tables into a form that creates empathy for the content itself.

WHAT IT'S NOT

Data visualization is **not** just for technical folks.

WHAT IT'S NOT

Data visualization is **not** heartless.

WHAT IT'S NOT

Data visualization is **not** complicated.

DATA VISUALIZATION IS SIMPLE

All data visualizations have the same fundamental building blocks.

We represent data with three types of marks:

Points

Lines

Area

And then we tell multiple marks apart by:

Position

Size

Color

Shape

SUCCESSIVE LOSSES IN MEN OF THE FRENCH ARMY IN THE CAMPAIGN OF RUSSIA

CHARLES MINARD

1869

Figurative Map of the successive losses in men of the French Army in the Russian campaign 1812 ~ 1813

Drawn by M. Minard, Inspector General of Bridges and Roads (retired).

Paris, November 20, 1869.

The numbers of men present are represented by the widths of the colored zones at a rate of one millimeter for every ten thousand men; they are further written across the zones. The red designates the men who enter Russia, the black those who leave it. — The information which has served to draw up the map has been extracted from the works of M.M. Thiers, de Ségur, de Fezensac, de Chambray and the unpublished diary of Jacob, the pharmacist of the Army since October 28th. In order to better judge with the eye the diminution of the army, I have assumed that the troops of Prince Jérôme and of Marshal Davout, who had been detached at Minsk and Mogilev and have rejoined near Orsha and Vitebsk, had always marched with the army.

The Scale of the Migrant Crisis, From 160 to Millions

By GREGOR AISCH, SARAH ALMUKHTAR, JOSH KELLER and WILSON ANDREWS UPDATED SEPT. 22, 2015

4

ARTICLES REMAINING

AREA CHART

THE SCALE OF THE MIGRANT CRISIS

NEW YORK TIMES

2015

This photo shows about **160** migrants in southern Hungary waiting to board a bus to a registration center on Sept. 9. They will be excluded from the only two relocation plans approved by European leaders so far. The plans will relocate a total of **160,000** people in Greece and Italy to other countries in Europe.

The plans add up to the largest agreement ever to distribute asylum seekers among member states. But they address only a small fraction of the expected total.

AREA CHART

THE SCALE OF THE MIGRANT CRISIS

NEW YORK TIMES

2015

Almost **549,000** migrants have arrived in Greece, Italy and Hungary alone this year, often by boat. Many want to move on to Germany or Sweden, which have stronger job markets and more benefits for refugees.

AREA CHART

THE SCALE OF THE MIGRANT CRISIS

"In the right hands, it can be a finely calibrated mechanism for taking advantage of limited resources... a solid routine fosters a well-worn groove for one's mental energies...." -Mason Currey, author of the inspiring book, *DAILY RITUALS*

THE MAKER'S QUESTION

Which **chart type** should I use?

GUIDING PRINCIPLE

Form follows **function**.

PICKING THE RIGHT CHART TYPE

PICKING THE RIGHT CHART TYPE

Typically we're looking for the most intuitive way to present the data.

GOOD REASONS TO CHOOSE A CHART

- ▶ It's easy to read. (When in doubt, start with a bar chart.)
- ▶ It draws the eye immediately to the key point of interest.
- ▶ It works well with the project's final delivery format.

BAD REASONS TO CHOOSE A CHART

- ▶ It's looks flashy, trendy, colorful, complex, or intimidating.
- ▶ It's easy to make in the software I happen to be using.
- ▶ It's the chart type I always use (or one I'm asked always to use.)

PICKING THE RIGHT CHART TYPE

ACCURACY

CORRECT CONCLUSION

- ▶ Start with Bars
- ▶ Avoid Circles
- ▶ Guide Inferences

THE AGE of BORDERS

When were the world's current borders first defined?

MAP

THE AGE OF BORDERS

PISSEGURI82

2018

Average border age by region:

Borders younger than 100 years (33,6%):

The 1815 Congress of Vienna, concluding the Napoleonic Wars, 'reset' many European borders to before the conflict and thus formalized many of them for the first time.

Andorra's mountainous, 120 km border with France and Spain was fixed in a feudal charter signed on 8 September 1278, making it the oldest remaining border in the world.

A stretch of roughly 200 kilometers, first established as a border by the 1422 Treaty of Melno between the Teutonic Knights and the Grand Duchy of Lithuania, became an international border again in 1990, now between Russia's Kaliningrad exclave and the Republic of Lithuania.
